Achievements for 2014

FHCi has been working tirelessly since 2011 on the work of promoting Homeoprophylaxis through educating supervisors, writing research, tracking data, and establishing FHCi as a 501(c)3 Public Charity. In September 2014 we were granted IRS charity status dating back to February 2013 when we established ourselves as a MN non-profit.

- To date all of the work on the board has been voluntary.
- Most of our travel has been paid for independently.
- To date we have 90 educated and certified HP supervisors in Canada, the United States, Japan and various countries in the EU.
- We are providing parents an alternative to vaccination.
- We do this work because we believe in it.

Over the summer of 2014 board changes included the departure r resignations of Cilla Whatcott - co-founder and Cathy Lemmon - International development and a temporary leave of absence of Sarah Hutchinson - International liaison to Canada. The loss of these board members stalled some of our direction and impetus. However, with the New Year, and two new board members we have regrouped and set our course for the future.

At the end of 2014 we closed the entrance to research for new families. We are still gathering papers and tabulating records but estimate that we have over 600 children entered in research: We will follow these families through the duration of the program..

In 2014 we stepped out into the world to introduce ourselves and further the work of expanding exposure to Homeoprophylaxis and education on infectious disease. Our work has been met with enthusiasm and interest around the world. Through attending, presenting or teaching at these conferences we have had the opportunity to gain understanding on access to homeopathy and homeoprophylaxis internationally and to assess the political and social climate of concern regarding the vaccine paradigm.

List of conferences and presentations:

- **April:** California - JAHC - 1.5 hour Presentation on HP as a public health care model.
- **May:** England - Royal Academy of Homeopathy - 1 hour Seminar presentation on HP and its effect on the immune system.
- **May:** England - International Council for Homeopathy - Annual Meeting - FHCi representation.
- **May:** Netherlands - Amma Resonance Healing Foundation, Conference: Epidemics - Attendance.
- **June:** Germany - FHCi outreach and connection tour.
- **July:** Paris - LMHI annual conference - 30 min Presentation on HP as a public health care model.
- **August:** Canada - Isaac Golden Conference on HP- Attendance/networking.

Message from the Board to our membership and the families that seek us out:

We believe that there has been a call from parents looking for ways to protect their children's health.

We believe the vaccine paradigm has become insufficient in its promise to prevent infectious disease and protect children's immune systems.

We believe that Homeoprophylaxis offers another way to educate children's immune systems.

We thank all the HP Supervisors who have dedicated themselves to continue this work.

We thank all the families who have entrusted their children's health in HP and for trusting in another way.

FHCi: Homeoprophylaxis for Free and Healthy Children!

- **September:** Minnesota - Holistic Physicians Conference – Attendance, FHCi Booth and networking.
- **September:** Minnesota - National Health Freedom Conference - Networking and FHCi Representation.
- **October:** Sweden - Full Weekend Conference Presentation on Infectious Disease, HP and vaccine injury.
- **November:** Turkey - 2 Full Weekend Conference Presentations on Infectious Disease, HP and vaccine injury.

Goals for 2015

As we have moved out of research we are entering an active marketing phase. While under research we could not advertise or actively seek participants to partake in the program. All participants came to us through word of mouth by those parents actively seeking an alternative to vaccination. We know that the pressure to 'do something' towards infectious disease prevention weighs heavily on parents minds. We are happy to offer another way.

Through volunteer support of our active members we are embarking on a variety of tasks for 2015:

- Increased social media campaign
- Updating website
- Continued education for existing HP Supervisors
- Educating more HP Supervisors
- Public lectures and teleconferences on Homeoprophylaxis
- Outreach to other types of health care practitioners.
- Increased relationship with the National Health Freedom Coalition and National Vaccine Information Center.
- Target marketing: Conferences; homeopathic schools; birthing networks.
- Looking for more opportunities for international education.

Financial Report for 2014

	Income	Expenses
Donations	5187.70	
Education	6592.00	
Membership dues	3720.60	
Public lectures	483.00
