EQUITY	
Opening balances.....	\$1,242.68
Unrestricted Net Assets	\$11,625.02
Net Income	-\$6,134.82
Total Liabilities and Equity	-\$17,621.00

Our Mission

We, FHCi and our Patron-members, are committed to informing about homeoprophylaxis (HPx) and expanding the use of and access to HPx, homeo-detox (HDx) and homeopathy, in the US & internationally, for educating our bodies toward infectious contagious disease.

We are dedicated to ongoing research regarding the efficacy and effectiveness of HPx and its short-term and long-term health outcomes in participating children and individuals around the world.

Through providing access to this safe, non-toxic program, our aim is for parents and communities to become empowered by witnessing the healthy maturation for generations to come.

2023 Annual Report

February 2024

2023 MARKED OUR 10TH ANNIVERSARY!

There are four significant features of this notable anniversary. In these 10 years we have completed two extensive research projects: long-term childhood immunization, and the coronavirus research. Both of these research projects have taken many volunteer hours, and in that process a lot of community building occurred because our family members and practitioners were a part of the research.

The first feature was that as a result of our childhood immunization research, we were able to expand our understanding of the relationship between our immune systems' roles in infectious disease and how homeoprophylaxis (HPx) can stimulate and strengthen that process by gently introducing disease energy to the immune system.

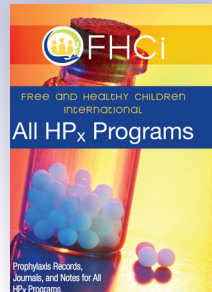

The application of HPx towards immune system education starts with a simple, yet radical precept: that by design, our immune systems are intended to work *with* infectious disease, and are *strengthened* as they go through the *normal* cycle of immune response towards that infectious disease.

Secondly, as we worked through the coronavirus research, not only were we providing information to the community about an alternative form of immunization, we are also moving through the evolutionary process that coronavirus has brought forth: and that is

towards the sovereignty of the individual, the strength in the self-governance of our immune system, and ultimately the evolutionary process of society-breaking down those structures that are no longer functioning for the greater good of humanity.

The third feature of this anniversary is the rollout of our new HPx programs that address various stages of immunological development in relationship to infectious disease as an individual matures through all ages. Our new website will include a secure database that will house the HPx programs that Patrons will use designed for at different stages of immunological needs.

Healthy Biome HPx
Full Childhood Immunological HPx
Young Adult & College Prep HPx
Travel HPx
Healthy Sexuality & Procreation HPx
Healthy Pregnancy & Fetal Development HPx
Immune Health for Elders HPx
Single Disease HPx

And finally, the fourth feature within our first 10 years is our success within the Homoeopathic community. Due to our persistent continued outreach and the relevance of our research, we are grateful for the increasing correspondence with an inquiring and embracing community.

Homeo-Detox: Resetting the System

Through our homeoprophylaxis research, we have realized, in some instances, that detoxification needs to happen prior to embarking on homeoprophylaxis. For the last few decades, vaccinations, medications, and environmental toxins have skewed normal immunological responses, resulting in disordered immune systems. In response to these realizations, FHCi is in the process of developing a series of Homeo-Detox (“HDx”) programs with the intention of returning the human system to its original baseline: our natural connection with the external and internal environments.

HDx aims to reset the system.

and strengthen is the health of mothers and infants, so that they may have intact immune systems free of toxins and the many other agents that detract from the best health possible. Only through robust future generations can we hope to continue with a thriving future on this planet. HDx aims to reset the system: it is an attempt to remedy some of those underlying issues that inhibit fertility, healthy gestation, and the vibrant growth of our children with intact immune systems.

Our HDx programs are a combination of one or more of the following medicines: including orthomolecular support, herbal remedies, low potency drainage support, organ specific remedies, miasmatic or constitutional remedies alongside potency-driven clearing of medications, environmental toxins, and/or vaccines. On a case-by-case basis, HDx is to be used before undergoing any homeoprophylaxis program because an intact and functioning immune system is necessary to facilitate elimination and interact with immunologic agents in a healthy way.

HDx Protocols are not intended to mitigate, prevent, treat, diagnose, or cure any preexisting medical condition but rather to release the free expression of your genetics towards health and balance. HDx may be necessary before embarking on a homeoprophylaxis program.

Research Accomplishments

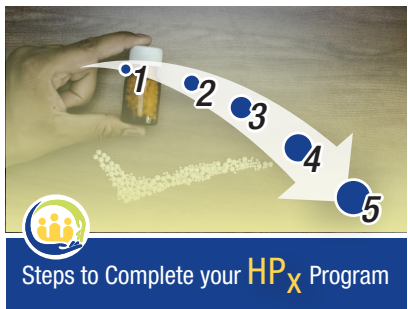

Since 2011, FHCi has completed two extensive research projects:

- 1) Full Childhood Immunological HPx program. Parts I and II were published in 2019 and 2020 respectively. This study encompassed 634 participants over eight years.
- 2) Coronavirus prophylaxis program with different aspects published in peer-reviewed journals and in audio-visual presentations in 2021 and 2022. This study encompassed 1,169 participants over one year.

FHCi extends our heartfelt thanks to all the participants who contributed to these programs. Your long-term commitment is greatly appreciated.

LOOKING FORWARD TO 2024

As we roll out our website with our new HPx programs, and the introduction of our HDx programs, FHCi is looking forward to another 10 years of work as we continue to research all of our programs.

1. Determine inclusion/exclusion
2. Intake
3. Enter doses & remedy responses
4. Exit interview
5. Download certificate

Collect \$100 rebate!

New patrons, as well as existing patrons (in the middle of HPx programs), will be able to confidentially enter their data into their Patron Portal housed within our new website. We’re offering a \$100 rebate to the first 100 registrants who finish their programs.

Volunteer and committee positions are available! For those family members and practitioners passionate about HPx, please contact us with your ideas, offerings, and capacity to be involved.

TOGETHER WE ARE
GROWING HEALTHY
CHILDREN AND FAMILIES.

UPCOMING 2024 CONFERENCES

As FHCi continues with our work, we are refining the concepts and the language with which to describe the programs and how they are working.

FHCi will be present at the following 2024 conferences:

February: Autism Health Summit

Jan-March: Luminescence Fertility & Pre-procreation Program

April: Joint American Homeopathic Conference

October: Wise Traditions/Weston A. Price

Plus various international conferences.
